

## ***B002 sliding door ball/ cone Trimmer***

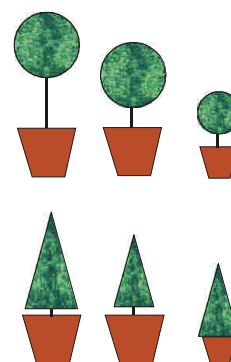

### **Sliding Door Trimmer – two trimming units**

Put a plant in the machine and move the door. When the door is closed the machine runs trimming. The other side can be refilled and then you move the door back and cut the other side. Very Fast.

The machines can cut different forms like: ball, cone the diameter is from 15 cm up to 50cm. The machine can trim SO FAST YOU CAN PUT A NEW PLANT IN:

With the form ball. There are some knives around a circle positioned. The plant will be taken on a revolving table and with the rotation the plant will be cut.

With the form cone. There is one high quality hedges-shears in a special angle positioned. The plant will be taken on a revolving table and with the rotation the plant will be cut. The diameter and the height can be variable changed.
