## Pot Filler *IM1800*

### Specifications

Capacity : 1.3 m<sup>3</sup>  
Length : 3.1m  
Width : 1.4m  
Height : 1.8m  
Weight : 500kg  
Pot Size : > 370mm high  
Power : 1.6kw

- No set up needed.
- Automatic soil recycling.
- 1300 Litre hopper
- Powerful and sturdy motor and gearbox.
- Easy for staff to use.
- Possible to add fertiliser unit.
- Staff more productive throughout the day.
- Less staff fatigue.
- Two or one person operation.

This machine is for the assisted filling of pots. The machine consists of a 1.3 m<sup>3</sup> hopper with a rubber belt on the floor, the mix volume can be gradually adjusted by the amount of movement on the belt in the hopper, this is done by turning a hand wheel. A unique feature is the vibrating grate under the pot filling area, this ensures that the pots are correctly filled and that the excess media is returned to be recycled. The user of this machine will find it exceptionally useful for bare root potting. The machine can run continuously or on demand by using the foot control. Single or double media outlets are provided as required. It comes with large wheels for mobility at the filling end and legs at the other end.
