TEA Transplanter

The XP610M is a ten head transplanter capable of planting up to 14,000 plants per hour. The machine is totally versatile, with very few tray limitations. No need for additional mechanical parts either or difficult changeovers with this machine, as any changes done are mostly via the keypad and computer. Changes are made by simply following the simple LCD menu screen and pressing buttons with only minor mechanical adjustments. Pick up and planting height adjustments at the press of a button. Most growers opt for TEA transplanters because of the reliability flexibility and ease of use. Join the elite set now and consider a TEA.
