- Very simple to operate

### TEA Transplanter

The already impressive RP606 is now complimented by the XP 404N. This machine is based upon the proven technology of the RP606 except this machine has a 400mm wide pack belt and up to 4 heads can be used. The machine is totally versatile, with very few tray limitations. No need for additional mechanical parts either or difficult changeovers with this machine, as any changes done are mostly via the keypad and computer. Changes are made by simply following the simple LCD menu screen and pressing buttons with only minor mechanical adjustments. Pick up and planting height adjustments at the press of a button. Most growers opt for TEA transplanters because of the reliability flexibility and ease of use. Join the elite set now and consider a TEA.
